PRODUCT LEAFLET

Addressable local alarm acknowledge unit 4445

FEATURES

· Eliminates unnecessary alarms in the system and to the fire brigade.
· Suitable for apartments or similar locations.
· Installed together with a smoke detector and a sounder base.
· If the detector goes into alarm the sounder is activated and the LED is lit. The user pushes the green button within 30 seconds (configurable) and then gets 3 minutes (configurable) to ventilate the smoke from the room.
